

## INKA BB at the IFSA 2014: Action and Research for Climate Change Adaptation in Land Use

Tuesday, 1 April 2014, 16:00 h  
Senatssaal Humboldt-Universität zu Berlin

In Brandenburg, innovation pathways for rural areas are being developed that aim to integrate productivity increases with sustainable agricultural land use. With a specific focus on adaptation to climate change; scientists, practitioners and corporate actors cooperate in operational groups on land use and water management issues. On field, farm and regional levels, innovations for practical climate change adaptation are tested and evaluated. Together, these groups form the large **Innovation Network for Climate Change Adaptation Brandenburg Berlin** ([www.inka-bb.de](http://www.inka-bb.de)) that comprises more than a hundred partners from practical land and water management, natural and social sciences, consultancies, regional administration and rural associations. Funded by the German Federal Ministry for Education and Research (BMBF) from 2009 to 2014, INKA BB thus represents a model for a large and integrative regional Research and Development approach aiming at the creation, implementation, assessment and dissemination of innovations.

Time	Programme	Responsibility
16:00	Opening Welcome to the IFSA community from LGF  Welcome from ZALF and INKA BB Introduction into the programme	Thomas Aenis, Frank Ellmer Hubert Wiggering Richard Bawden
16:15	INKA BB – What we planned and what we learned: Perspectives from the coordinators - Action Research - Agricultural land use - Water management	Andrea Knierim Wolfgang Scherfke Stefan Kaden
16:45	INKA BB – An evaluative dialogue between - a farmer and - a scientist	Martin Suer Johann Bachinger
17:10	Exchanges with the plenary - facilitated discussion	Richard Bawden
18:00	Get together with food and drinks Visit pictures and products from INKA BB
